

TOMUS XXVIII.

<i>Járai A.</i> : Laudatio to Professor Imre Kátai	5
List of publications of Imre Kátai	15
<i>Allouche J.-P. and Sondow J.</i> : Infinite products with strongly B -multiplicative exponents	35
<i>Barat G. and Grabner P.J.</i> : Limit distribution of Q -additive functions from an ergodic point of view	55
<i>Bodó B. and Kovács M.</i> : On the stability of the R -rational choice function	79
<i>Bui Minh Phong</i> : On some pairs of multiplicative functions with small increments	97
<i>Buldygin V.V., Indlekofer K.-H., Klesov O.I. and Steinebach J.</i> : Asymptotics of renewal processes: Some recent developments	107
<i>Burcsi P., Kovács A. and Papp-Varga Zs.</i> : Decision and classification algorithms for generalized number systems	141
<i>Csajbók T., Járai A. and Kasza J.</i> : On representing integers as quotients of shifted primes	157
<i>Daróczy Z.</i> : On a family of functional equations with one parameter	175
<i>Dávid Á., Kozma L. and Pozsgai T.</i> : On the model checking of a system consisting of many similar components	183
<i>DeKoninck J.-M., Doyon N. and Letendre P.</i> : On the distribution of the number of digits needed to write the factorization of an integer	197
<i>Demetrovics J., Molnár A. and Thalheim B.</i> : Graphs representing sets of functional dependencies	213
<i>Farkas G. and Fülöp Á.</i> : The sandbox method in quadratic fields	235
<i>Farzan R.</i> : On properties of the singular integral operator for the Maxwell equations	249
<i>Fugelo N. and Velichko I.</i> : Average orders of divisor function of integer matrices in $M_3(\mathbb{Z})$	261
<i>Gonda J.</i> : On the problem of the choice of the radix	271
<i>Gunyavý O. and Varbanets P.</i> : Exponential sum on algebraic variety $\frac{\alpha}{f_1(x,y)} + \frac{\beta}{f_2(X,Y)} = 1$	283
<i>Indlekofer K.-H.</i> : Identities in the convolution arithmetic on number theoretical functions	303
