

**TOMUS VII. (1987)**

<i>Kása Z. and Tãmbulea L.</i> , Binary trees and number of states in buddy systems .....	3
<i>Lakatos L.</i> , On systems with bulk arrival and group service I. ....	11
<i>Egorychev G.P., Ivani A. i Makosij A.I.</i> , Analiz dvukh kombinatornykh summ, kharakteri- zuyushchikh skorost' EVM s blochnoj pamyat'yu .....	19
<i>Székelyhidi L.</i> , $L^p$ -approximation by splines .....	33
<i>Eissa R.P.</i> , Riemann boundary value problem and singular integral equations on a new class of functions .....	41
<i>Fawzy Th. and Ramadan Z.</i> , Spline approximations for a system of ordinary differential equa- tions II. ....	53
<i>Daróczy Z. and Kátaí I.</i> , On differentiable additive functions .....	63
<i>Farkas M., Garay B., Szabó G., Szépkuti L. and V.Nagy I.</i> , Modelling of depth filtration .....	67
<i>Fawzy Th.</i> , $(0, 2, 4)$ lacunary interpolation with $g$ -splines .....	75
<i>Bassily N.L. and Ishak S.</i> , On $L_1$ -mean oscillating random variables .....	79
<i>Lischke G.</i> , Strenge Separation von $NP$ und $P$ unter Relativierung bei gleichzeitigem Kollaps von nichtdeterministischer zu deterministischer Exponentialzeit .....	87
<i>Kovach A.</i> , Asimptoticheskie razlozheniya v sluchae approksimatsii obobshchennym zakonom Puassona .....	99
<i>Gönczi I. and Kálovics F.</i> , An iterative formula for special Chebyshev approximations .....	103
<i>Móri T.F.</i> , On the expectation of the maximum waiting time .....	111
<i>Zsigmond I.</i> , Mixed integer linear fractional programming by a branch and bound technique .....	117
<i>Kósa A. and Shamandy A.</i> , Discontinuous variational problems of higher order .....	131
<i>Brauer W. and Vogler W.</i> , On routing constraints in packet switching networks .....	139
<i>Shamandy A. and Varga Z.</i> , On an infinite-person dynamic coalition game .....	149
<i>Klafszky E. and Terlaky T.</i> , Remarks on the feasibility problem of oriented matroids .....	155
<i>Sonnevend Gy.</i> , Stabilization and acceleration of the ellipsoid method for the minimization of convex nonsmooth functions .....	159
