Contents

Bibliography	5
Index	6
Name Index	7

Bibliography

This bibliography is made by HBibTEX. First key of the sorting is the name of the authors (first author, second author etc.), second key is the year of publication, third key is the title of the document.

Underlying shows that the electronic version of the bibliography on the homepage of the book contains a link to the corresponding address.

Index

This index uses the following conventions. Numbers are alphabetised as if spelled out; for example, "2-3-4-tree" is indexed as if were "two-three-four-tree". When an entry refers to a place other than the main text, the page number is followed by a tag: ex for exercise, fig for figure, pr for problem and fn for footnote.

The numbers of pages containing a definition are printed in *italic* font, e.g.

time complexity, 583.

Name Index

This index uses the following conventions. If we know the full name of a cited person, then we print it. If the cited person is not living, and we know the correct data, then we print also the year of her/his birth and death.
